

**Examples:**

4 Box / banner 255x310 pixel

**Actions:** Animation on hover + Button.

**Add the Symbol:** If you drag the symbol in the scene cancel the "Timeline Action" created by Hype in the Main Timeline.

The symbol will start automatically with the mouse over.

**Elements:** Hype© code + SVG shapes

**Project complexity:** Easy

**External Javascript:** NO

**External Resources:** YES 4 images (one image for each banner)  
SVG shape imported in the inter HTML ( only in box n°3)

**Tested on Desktop Browsers**

Firefox, Chrome, Safari, Opera, Internet Explorer: 9 (no animation) /10/11

**Mobile:** *Android:* firefox, Chrome, Opera / *Apple:* Chrome, Safari

Partial support for CSS3 transform Property: Internet Explorer 8/9

## Customization:

- **Replace images:** easy

Edit original images with an external image editor.

Retina images:

Make sure to replace also the “@2x” version in the inspector panel.

- **Edit the Size of the Box:** be careful

in some cases the animation has multiple objects with rotation with different coordinates of the "transform origin". Be careful if you change the size.

### Complexity:

Box1: medium	Rectangles + Translations + Rotations
Box2: medium	Rectangles + Translations + Rotations
Box4: easy	Rectangles + SVG (not animated) + Translations
Box5: easy	Rectangles + Ellipse + Translations
