Hype© 3

# Page/Box Flip Effect

Example with 2 pages

**Elements:** Pure Hype code

**External Javascript:** NO

**Audio:** YES, 1 sound (wav, mp3, ogg)

**Images:** YES, 2 + 2 + shadow (PNG with alpha channel)

**Project complexity:** Medium

**Customization:**

- Replace images: easy

Edit original images with an external image editor.

- Edit Size  $x = y$  : easy
- Edit Size  $x \neq y$  : be careful

Make sure to change one image at a time. Original size:

internal images = 400x400

external images = 402x400

**Change timing:** easy

Scale all animations in the Symbol and then check keys alignment.

**Add more contents:** be careful

Make sure to add the deformation (read below) to each element.

**Retina images:**

Add the “@2x” version of each image in the inspector panel.

**Limitations:** (in this version)

Trick for the perspective distortion

Reduced height of each element in (50%) during the rotation of the page.

This means you can not use text elements. You can use images or elements with the same width of the box (edge to edge).

**Tested on Desktop Browsers**

Firefox, Chrome, Safari, Opera Pc

Internet Explorer: 10/11

**Mobile:**

*Android:* firefox, Chrome, Opera, xScope Pro

*Apple:* Chrome, Safari

**Best performances:**

*Mac:* Safari and Chrome desktop / mobile

*Windows:* Chrome desktop / mobile

*Android:* Chrome

**Partial support for CSS Transforms:**

Internet Explorer 8/9

Opera Mac partial support.

**improvements ?**

Add javascript to decrease perspective distortion.

Any bugfix.
